 Artrack Extrusion
 White 2m

ARTRACK INSTALLATION INSTRUCTIONS

INSTALLATION INSTRUCTIONS

Installation

- Using a string line, spirit level or laser level, mark a line at the desired height for the artrack fixings.
- Along the line, mark out your fixing positions as per the plastic fitting guide below. If mounting on masonry or concrete use a 5mm masonry bit to drill pilot holes.
- Once the fixing holes are marked and drilled you then need to attach the fixing clips to the wall. Different wall's will require different wall anchors depending on your surface, Plasterboard = Wall Mates + Screws, Concrete or Cavity Brick = Wall Plugs + Screws, Studded Wall = Wood Screws.
- Once your fixing clips are mounted to the wall, simply install your track by pushing the track onto the fixing clips.
- Make sure the track is secure on the wall before attaching your hanging accessories.

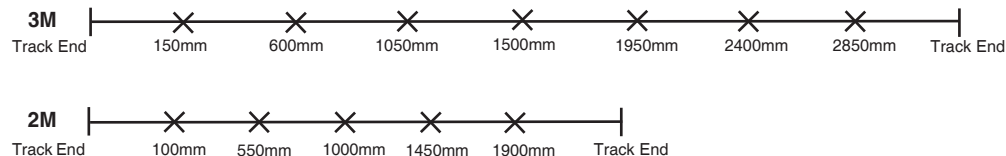

Application

Artrack extrusion can be used on gyprock, masonry and concrete walls.

Warning

Remember to wear eye and ear protection, and always follow safe work practices, when installing artrack picture hanging solutions.
