NON Methylene Chloride Paint Stripper!

Diggers Paint Stripper Plus is a **non methylene chloride** alternative that deeply penetrates and quickly lifts paint for easy removal. Its **industrial strength** formulation gets straight to business, quickly penetrating to remove multiple layers in 30 minutes and **staying wet up to 24 hours**. This flexibility in application allows you to complete a total project in one application.

Where to Use...

Diggers Paint Stripper Plus removes oil and water based paints, acrylics, varnishes and epoxies from timber, metal and masonry surfaces and is suitable for residential, commercial, automotive and marine applications. No masking smells are added making its **low odour** formulation ideal for indoor use.

How To Use...

Simply apply with a brush or roller and allow the paint to soften. Using a paint scraper or steel wool, agitate treated surface before paint re-hardens. Should any paint remain simply apply a second coat. Completing the process, Diggers Paint Stripper Plus has special additives that allow residue to be **rinsed easily with water from brushes and equipment**.
