

AquaSleeve®

FLEXIBLE FLUME DOWNPIPES

TEMPORARY DOWNPIPE

AquaSleeve® is a heavy duty UV stabilised plastic tubing which can be clamped or taped to an outer pipe for the following applications:

TEMPORARY DOWNPIPES

For building sites where it is beneficial to redirect storm water during construction to avoid excess surface water and muddy, efficiency reducing conditions.

TEMPORARY FLEXIBLE FLUMES

Prevents erosion by controlling water from outlet pipes down embankments & across and to a suitable release point – Aqua Sleeve® will fit up to a 130mm O/D outlet pipe.

WATERPROOF SLEEVE BETWEEN PVC PIPE WORK & CONCRETE

PVC Pipe work and Concrete allows for expansion and contraction between PVC and concrete.

Temporary water control tubing and waterproof pipe sleeve.

UV stabilised for longer life.

25 metre roll

Fits up to 130 mm diameter pipes.

Sleeve between PVC pipe work and concrete.

Temporary flexible flume for water control.
