

## **Congratulations on your purchase of a Parkwood Duramax fibreglass door!**

Please take care and wrap or cover your door with some protection to ensure it is in good condition before and after coating, until site work is finished. Enjoy your door for years and years to come. On Duramax fibreglass doors:

1. Both sides of the door must be coated in the same product and colour because a dark colour one side and a light colour the other can cause the door to bow.
2. Colours with LRV of more than 10% must be used (see your paint manufacturer for the LRV rating).  
The guarantee will be void if these conditions are not adhered to. Parkwood do not recommend dark gloss colours.
