- GRIND CHAMBER 1180ml LARGE CAPACITY
- 10 YEAR WARRANTY
- BUILT-IN AIR SWITCH (33MM HOLE FOR BUTTON)
- MADE IN THE USA

A LITTLE HISTORY

1927

Tinkering with an idea and some sheet metal, Racine architect John W. Hammes invents the first food waste disposer.

The 1930s

In 1935, after eight years of design refinement, he obtains U.S. Patent for his new-fangled food waste disposer.

The 1940s

Bob Cox, vice president of sales sold disposers to plumbers instead of appliance dealers and by 1952 he pitched the product out of pink Pontiac.

The 1950s

As television came of age, so did television advertising. And InSinkErator used the power of celebrity endorsements of George Burns, Barbara Walters, and later Phyllis Diller.

The 1960s

Emerson Electric Co. purchases InSinkErator.

The 1970s

InSinkErator started producing Trash Compactor and Hot Water Dispensers.

The 1990s

New York City Department of Environmental Study concluded a two-year analysis, and approved the use of food waste disposers.

2000 and beyond

InSinkErator launched the Evolution Series®. With the new series came advanced sound, grind, anti-jam and antivibration technologies.

ADVANCED TECHNOLOGY

QUICKLOCK™ SINK MOUNT

"twist-on, twist-off" sink mount makes installation fast and easy.

SOUNDSEAL™ TECHNOLOGY

Anti-Vibration Mount™ Quiet Collar™ & Sound Limiter™ insulation technology.

MULTIGRIND™ TECHNOLOGY

3-stage design makes quick work of both hard and fibrous foods.

DURADRIVE™ INDUCTION MOTOR

Powerful, heavy-duty motors ensure high performance and long life.

POWERBOOST™ MICRO PROCESSOR

Delivers more power to boost the grinding capability.

Cut-away of Model Evolution 200.

SAFE ON THE SEPTIC

InSinkErator Food waste disposers have always been safe for properly sized septic systems. For example, if your system is sized for a dishwasher or clothes washer, it can handle a disposer. After all, a disposer uses only about as much water per day as one flush of a toilet.

ENVIRONMENTAL BENEFITS

Each year in New Zealand, tonnes of food waste is trucked to landfills. Once there, it quickly decomposes and produces methane, an environmentally harmful greenhouse gas at least 21 times more potent than CO2. Our food waste disposers provide a convenient and environmentally friendly alternative to transporting leftovers to landfills. Plus, capable wastewater treatment plants can even recycle food scraps into energy and fertilizer.

Description of wastewater treatment plant with anaerobic digestion, co-generation and beneficial reuse of bio-solids.
