IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: valve adapters and accessories.

WARNING

The following actions will result in the warranty being void.

• If the tool has been operated on a supply voltage other than that specified on the tool.
• If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
• Failure to perform maintenance as set out within the instruction manual.
• If the tool is disassembled or tampered with in any way.
• Professional, industrial or high frequency use.
### 1. Assembly

**Assembling The Wheels & Castors**

1. Turn the container upside down.
2. Insert the castor assemblies into the frame at the base of the tank. Use firm hand pressure.
3. Press the wheels into either side of the frame at the base of the tank.

**Fitting the Motor**

1. When fitting the motor to the tank, position it so that the motor securing clips on the tank align with the fastening points on the motor.
2. Fasten the motor securing clips to the motor, making sure that they lock into place correctly.
3. To remove the motor, open the motor securing clip and lift the motor out of the tank.

---

**WARNING! ENSURE THE TOOL IS TURNED OFF AND DISCONNECTED FROM THE POWER SUPPLY BEFORE PERFORMING ANY OF THE FOLLOWING OPERATIONS.**

---

**ACCESSORIES**

1. Accessory Mount
2. Cord Retaining Carry Handle
3. Motor
4. Blower Outlet
5. Motor Securing Clips
6. Tank
7. Wheels
8. Castors
9. Tank Drainage Outlet
10. Vacuum Inlet
11. Power Take-Off Socket
12. On/Off/Power Take Off Switch
13. Hose
14. Extension Tubes
15. Floor Tool
16. Crevice Tool
17. Foam Filter
18. Dust Bag
19. Pleated Filter

---

**ONLINE MANUAL**

Scan this QR Code with your mobile device to take you to the online manual.
Fitting the Handle

1. Align the base of the handle with the grooves on the motor housing.

2. Insert the two supplied screws into the holes in the handle and fasten in place with a screwdriver (not supplied).

Fitting the Pleated Filter - Vacuuming Dry Matter

For dry vacuum cleaning always use the pleated filter. Mount the pleated filter, so that no air is sucked through the filter cage without being filtered.

1. Press the open end of the pleated filter onto the filter cage.

2. To remove the filter, grasp the hard plastic base of the filter and pull it off the filter cage.

NOTE: Do not use the foam filter when vacuuming dry matter.

2. FILTER SELECTION

WARNING! NEVER USE THE WET AND DRY VACUUM CLEANER WITHOUT A FILTER. ALWAYS ENSURE THAT THE FILTERS ARE PERFECTLY SECURE!
Fitting the Foam Filter - Vacuuming Liquid

For wet-vacuuming, slip the supplied foam filter over the filter cage.

NOTE: Do not use the pleated filter and/or dust bag when vacuuming liquid.

WARNING! SWITCH OFF THE EQUIPMENT IF LIQUID OR FOAM IS EMITTED WITH THE EXHAUST AIR WHEN WET VACUUM CLEANING.

WARNING! THE WET & DRY VACUUM IS NOT SUITABLE FOR THE VACUUMING OF COMBUSTIBLE LIQUIDS.

Fitting a Dust Bag - Vacuuming Dry Matter

For vacuuming fine, dry dirt it is recommended that you fit a 35 litre dust bag. This will ensure that the pleated filter does not clog up so quickly and help maintain the vacuuming power. A dust bag is suitable for dry vacuuming only. Using the dust bag makes it easier to dispose of the dust that has been collected.

1. To attach, slip the dust bag over the vacuum inlet on the inside of the tank.

Draining Liquids From The Tank

Spills and puddles can be vacuumed directly into the tank with the addition of the foam filter for easy clean up and disposal.

1. Hold the vacuum over a laundry sink or household drain.

Note: Only dispose of liquid waste into household sinks & drains if safe to do so. Improper disposal of hazardous waste can cause pollution and harm.

2. Turn the drain outlet cap anti-clockwise to loosen and remove it.

3. Allow any collected liquid in the tank to flow out. Tip the vacuum slightly to allow any liquid at the bottom of the tank to flow out too.

4. Replace the drain outlet cap and rinse out the tank if necessary.

3. WASTE DISPOSAL
**Hose Outlet Selection**
Connect the suction hose to the appropriate outlet on the wet and dry vacuum, depending on the application required:

**Vacuuming**
Connect the suction hose to the vacuum inlet.

**Blowing**
Connect the suction hose to the blow outlet.

**Extension Tubes**
1. The suction hose can be extended by attaching one or more sections of the 3 part extension tubes.

**Suction Tools**

**Floor Tool**
The floor tool is for vacuuming solids and liquids over medium to large areas.

**Crevice Tool**
The crevice tool is designed for cleaning crevices and edges.
Vacuuming or Blowing

1. Press the right side of the switch to turn the unit on.

2. Press the switch to the centre position to turn the unit off.

**WARNING! WHEN WET VACUUMING, THE SAFETY FLOAT STOPS THE VACUUM SUCTION AUTOMATICALLY WHEN THE MAXIMUM CAPACITY IS REACHED. TURN OFF THE VACUUM & EMPTY THE TANK BEFORE CONTINUING TO VACUUM.**

Note: Moving the vacuum back and forth across certain flooring types can cause a buildup of static on the tank, which may give you a shock when you touch it. An anti static chain has been attached to the tank to prevent this from happening.

Power Take Off Mode (Max. Supplied Power: 1200W)

The power take off mode allows you to start the vacuum cleaner automatically by turning the connected power tool on. When you switch off the power tool, the wet and dry vacuum cleaner switches off as well after a preset delay.

1. Connect the power cable on your electric tool to the Power Take Off Socket and connect the suction hose to the extractor connector on your power tool. Check that the connections are secure and airtight.

2. Set the switch on the wet and dry vacuum cleaner to the power take off mode.

3. Follow normal operating procedures for the connected power tool.

Thermal Overload Protection

The power take off outlet is equipped with an automatic thermal overload protector. This feature is designed to prevent permanent damage from occurring to the unit when it overheats during use.

**WARNING! DO NOT ATTEMPT TO TURN ON THE CONNECTED POWER TOOL AGAIN IF IT SHUTS OFF AT ANY TIME DURING USE. THE THERMAL OVERLOAD PROTECTOR HAS KICKED IN.**

1. Turn the on/off switch to the off position for both the vacuum and connected power tool.

2. Disconnect the power tool from the power take off outlet and check the rating label of the power tool.

**WARNING! THE POWER TAKE OFF OUTLET HAS A MAXIMUM LIMIT OF 1200W. TOOLS WITH A HIGHER POWER RATING SHOULD NOT BE CONNECTED TO THIS OUTLET.**

3. Allow the unit to cool down completely. Approximately 10 minutes (depending on ambient conditions). The thermal overload protector will automatically reset when the tool temperature has dropped within safe operating temperatures.
6. APPLIANCE CARE

Cleaning

- We recommend that you clean the appliance immediately after you use it.
- Keep the safety devices, air vents, and the motor housing free of dirt and dust as much as possible. Wipe the equipment with a clean cloth.
- Clean the appliance regularly with a damp cloth and some soft soap. Do not use cleaning agents or solvents; these may be aggressive to the plastic parts in the appliance.

Cleaning The Motor Housing

Clean the appliance regularly with a damp cloth. Do not use cleaning agents or solvents; these may be aggressive to the plastic parts in the appliance.

Cleaning The Tank

The tank can be cleaned with a damp cloth and some soft soap or under running water, depending on the amount of dirt.

Cleaning The Foam Filter

Clean the foam filter with a little soft soap under running water and allow it to air-dry.

Storage

Ensure the Wet & Dry Vac has been fully emptied of any dry matter or liquid before it is stored. Wrap the power cable around the cable hooks. Keep all the accessories with the unit to avoid losing them.

Keep in a dry place out of reach of children.

Supply Cords

If the replacement of the supply cord is necessary, this has to be done by the manufacturer or his agent in order to avoid a safety hazard.

Note: Ozito Industries will not be responsible for any damage or injuries caused by the repair of the tool by an unauthorised person or by mishandling of the tool.

CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials. Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

SPARE PARTS

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse.

For further information, or any parts not listed here, visit www.ozito.com.au or contact Ozito Customer Service:

ELECTRICAL SAFETY

WARNING! When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage.

Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool. Save these instructions and other documents supplied with this tool for future reference.

The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.

Note: The supply of 230V and 240V on Ozito tools are interchangeable for Australia and New Zealand.

The supply of 230V and 240V on Ozito tools are interchangeable for Australia and New Zealand.

GENERAL POWER TOOL SAFETY WARNINGS

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Have all warnings and instructions for future reference. The term ‘power tool’ in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety
a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.

b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite vapours.

c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. Electrical safety
a. Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.

b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.

c. Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.

d. Do not abuse the cord. Never use the cord for carrying or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or frayed cords increase the risk of electric shock.

e. When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.

f. Personal safety
a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use it if you are tired or under the influence of drugs, alcohol or medication. Distractions can cause you to lose control.

b. Use personal protective equipment. Always wear eye protection. Use approved safety equipment such as hard hat, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce risk of electric shock.

c. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energizing power tools that have the switch on invites accidents.

d. Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

e. Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

f. Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.

3. Power tool use and care
a. Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazard.

b. Keep handles and grasping surfaces dry, clean and free from oil and grease. Slippery handles and grasping surfaces do not allow for safe handling and control of the tool in unexpected situations.

c. Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts, and any condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.

d. Use personal protective equipment. Always wear eye protection. Protective equipment such as dust masks, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.

e. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energizing power tools that have the switch on invites accidents.

WET & DRY VACUUM SAFETY WARNINGS

The appliance is not to be used by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.

Young children should be supervised to ensure that they do not play with the appliance.

WARNING! When using the equipment, a few safety precautions must be observed to avoid injuries and damage. Please read the complete operating manual with due care. Keep this manual in a safe place so that the information is available at all times. If you give the equipment to any other person, give them these operating instructions as well.

We cannot accept any liability for damage or accidents which arise due to a failure to follow these instructions and the safety information.

• Do not leave appliance unattended when plugged in. Unplug from outlet when not in use and before servicing and cleaning.

• To avoid electric shock, do not expose to rain. Store indoors.

• Never use in the presence of explosive liquids, vapours or explosive dust – such as coal or grain.

• Never pick up asbestos or asbestos dust.

• Wood dust and chips in a confined area can give rise to fire or an explosion. Guard against possible ignition sources.

• Do not pick up anything that is burning or smouldering – such as metal grinding dust, cigarette ends, hot coals, matches or similar.

If the replacement of the supply cord is necessary, this has to be done by the manufacturer or his agent in order to avoid a hazard.

Using an Extension Lead
Always use an approved extension lead suitable for the power input of this tool. Before use, inspect the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective.

When using an extension lead on a port, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.

The power outlet for the compressor is recommended to be protected by a 30amp residual current device.

• The appliance is not intended for use by young children or infirm persons without supervision.

• Young children should be supervised to ensure they do not play with the appliance.

• Use only manufacturer’s recommended attachments and consumables.

• Never modify the cleaner in any way - this is dangerous and will invalidate the warranty.

• Do not use cleaner without the filter in place.

• If motor sound becomes higher pitched always check for the following:

- Blocked hose or accessory.
- Blocked filter.
- Full container.
- Never try to move the cleaner by pulling with the mains lead.
- Always check that the filter is clear and not blocked. Keep all openings clear of any blockages.
- When lifting the unit, always lift it with the handle or under rim of bucket. Beware of excess weight.
- Always switch the unit off before changing attachments or connecting different power tools.
- Always disconnect equipment from the appliance when it is not in use.
- If the cordset is damaged it have it repaired by an authorised service centre.
- The wet or dry vacuum cleaner is designed for use with dry vacuuming using the appropriate filter. The appliance is not suitable for the vacuuming of combustible, explosive or harmful substances.

• The equipment is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse. The user / operator and not the manufacturer will be liable for any damage or injuries of any kind caused as a result of this.
