ASK ABOUT OUR PREFERRED INSTALLERS IN YOUR AREA

# LEGAL REQUIREMENTS Please read carefully

- The Fencing of Swimming Pools Act 1987 requires owners to fence the pool and its immediate area according to the specifications in the law. Please consult your Local Authority regarding compliance.
- You are required by this law to register your pool with your local Authority.
- It is your responsibility, as a pool owner, to comply with the Fencing of Swimming Pool Act 1987.
- Your Local Authority must be advised of the intention to construct or install a pool.
- For interpretation queries on the Law please contact your Local Authority.
- The gate must always open away from the pool.
- The gate must self close. After installation test the opening and closing operation of the gate. Open the gate to 150mm opening and release and the gate should self close.
- The gate must not have ground clearance of more than 100mm.
- Panels must be no higher than 100mm above ground level.
- There is to be no other support such as rail, tree, deck or bracing of any kind which would allow climbing from outside the pool area within 1.2m.

## COATINGS

### Galvanised

Cyclone Pool Fencing panels, posts and all fittings are manufactured using high quality materials and finished with a hot dip galvanised coating to provide users with excellent prolonged life characteristics.

### Powder Coated (over galvanised coating)

All Cyclone Pool Fence components can be powder coated and are available in either Hawthorn Green or Black Satin.

**IMPORTANT:** In coastal environments double powder coating is recommended to maintain a long term quality coating appearance (additional charge).
