New Integrated
Bathroom LED Fan Heater

Innovative self-regulating fan heater
with dedicated high-performance extraction and high output LED light

4-in-1 Bathroom Unit

- Ultra modern, high performance bathroom unit with integrated fan heat, LED light and exhaust function
- Stylish ultra slim design
- Energy efficient self-regulating heater
- Two user-selectable levels of heating
- Fan forced heat creates a comfortable and warm environment
- Fan air circulating function ideal for summer cooling
- Dedicated high performance air extraction ideal for control of steam and moisture
- Premium LED light panel with high lumen output

Two Fan Unit

Dedicated fans for the specialised functions of extraction (55W fan) and heat/air circulation (40W fan).

Healthy Heat

Having warmth in the bathroom not only feels great, but also helps to minimise damaging steam and moisture build up.

Lighting Up

LED lighting adds to a better environment and lower power bills with 1500 lumens a true light source for your bathroom.

Steam Extraction

A common misconception is that a small bathroom only needs a small exhaust system. During colder months, where steam production is at its highest, a small bathroom can actually fill up with steam much faster than a larger bathroom. Using a combination of heating and a good quality exhaust system is essential in minimising this effect.

Product Codes

FAN7020	Bathroom LED Fan Heater - White
FAN7021	Bathroom LED Fan Heater - Black

Technical Specifications

Supply	220-240V AC, 2115W
Fan Type	Centrifugal
Exhaust Fan Performance	106 l/s, 380m ³ /hr (free-air performance)
Exhaust Fan Power	55W
LED Light	20W, 1500 lm
LED Colour	4000K
Heater Fan Power	40W
Heater Wattage (L/H)	1100/2000W
Cut Out Size:	523mm x 345mm
Min. Install Depth	250mm
Duct Size	150mm
IP Rating	IPX2
