

CURVE™

TWIST®

The New Era of Rainwater Harvesting

MADE USING
BEST ENVIRONMENTAL
PRACTICE™

EVERY DROP COUNTS

With rising water usage costs, growing pressure on infrastructure and environmental concerns, it is becoming increasingly important to capture and utilise the free rainwater that falls on your roof.

As established experts in rainwater solutions, Marley brings you Curve and Twist, ushering in The New Era of Rainwater Harvesting.

These innovative, streamlined products help to filter and capture free rainwater and have been specifically designed and manufactured in New Zealand for New Zealand conditions.

Water is our most precious natural resource, and a regular clean supply, whether in urban or rural areas, can no longer be taken for granted.

Easily installed, you can put both Curve and Twist onto the same downpipe/s to really maximise clean water capture.

And when integrated as part of a Marley spouting and downpipe system they carry the same Marley 15 year guarantee.

15 YEAR GUARANTEE

LOW MAINTENANCE

 **MARLEY**

CURVE™

The new Marley Curve™ is a leaf diverter that combines sleek, sophisticated design with innovative filtering technology for cleaner water. Its unique screen design draws rainwater in while preventing leaf matter and other debris from entering your water tank or stormwater system.

Many New Zealanders are dependent on roof water for drinking and cleaning. This number increases over the summer months with many people holidaying in locations with a tank only water supply.

The Marley Curve significantly curbs the amount of solid matter that can flow into the tank. This reduces the subsequent build-up of sediment which affects the quality of potable water. It can also reduce the strain on in-line water filters and pumps and thus the cost of maintaining them.

Leaf diversion is also important in areas where rainwater flows straight from the roof into the stormwater system. Removing debris lowers the risk of drain blockage and the potential for backflow/overflow.

Available in six colours to match the Marley Stratus Design Series, Curve integrates easily into the Marley RP80® downpipe system and carries the same Marley 15 year guarantee.

Marley Curve – drawing water in, keeping leaves out

- ✓ Filters leaves and debris for cleaner water
- ✓ Cleaner water into your tank improves water quality and reduces maintenance
- ✓ Reduces chance of your drains blocking
- ✓ Quick release upper body for easy maintenance
- ✓ Streamlined design with unique screen

**Water in,
leaves out**

Innovative screen

The unique design draws water through to maximise capture

Self-cleaning

Low maintenance option for filtering leaves and debris

Easy installation

No glue required. Installation guide supplied

Easy Installation

Curve can perform anywhere on the downpipe and can be easily installed in a few simple steps.

Hints and Tips

If Curve is being connected to a tank:

- a. The tank must be at least 300mm lower than the spouting; and
- b. Curve must be above the inlet to the tank.

Consideration should always be given as to where leaves and debris are being discharged. e.g. if possible avoid discharging onto pathways and decks.

Regularly check the Curve filter screen to ensure that there are no debris on it blocking water flow.

Routinely wash the filter screen. Slide the top unit up the pipe to allow removal of screen from the bottom unit for cleaning.

Replacement screens are available if required.

Curve is designed for the Marley RP80® 80mm downpipe system. Adaptors are available to connect to other downpipe sizes.

STRATUS®
DESIGN SERIES

TWIST®

The new Marley Twist® is a compact rainwater diverter that turns your downpipe into a free source of water. Quick connect any standard garden hose, "twist" to the on position and enjoy the benefits.

Residential collection of free rainwater in smaller tanks is increasingly popular in New Zealand, particularly in urban residential areas. Rather than letting rainwater flow away into the storm water system, Twist can be used to divert rainwater to a storage tank for a multitude of purposes.

In rural settings Twist can also be used to divert water to drinking troughs for animals close to the house or out buildings. Twist includes an easy clean removable leaf filter to keep large matter out of the collection tank.

Available in six colours to match the Marley Stratus Design Series, Twist integrates easily into the Marley RP80® downpipe system and carries the same Marley 15 year guarantee.

Marley Twist – water when you need it

- ✓ Provides access to free rainwater from your downpipes
- ✓ Great source of water for the garden, to top up the pool, or for emergency supply
- ✓ Positive impact on the environment through reduced mains water usage
- ✓ Filters leaves and debris for cleaner water

Eco friendly,
conserves
water

Convenient water access

Easy, twist on-off control and direct connection to standard hose fittings

Leaf filter

Easy clean filtration of leaves and debris

Easy installation

No glue required. Installation guide supplied

Easy Installation

Twist can perform anywhere on the downpipe and can be easily installed in a few simple steps.

Hints and Tips

If Twist is being connected to a tank:

- a. Install Twist anywhere on the downpipe that is easily accessible for turning it on and off.
- b. If using the direct to tank connection make sure Twist is installed above the tank inlet point.

Regularly check the Twist filter to ensure that there are no debris blocking water flow.

Routinely wash the filter. Slide the top unit up the pipe to allow removal of the filter from the bottom unit for cleaning.

Replacement filters are available if required.

Twist is designed for the Marley RP80® 80mm downpipe system. Adaptors are available to connect to other downpipe sizes.

Sustainable Manufacturing

Marley is committed to creating environmentally sustainable processes and products and was the first plastics manufacturer in New Zealand to achieve ISO14001 registration. We are also Best Environmental Practice certified for our entire range of manufactured uPVC systems. This means we get our raw materials from sustainable and responsible sources, continuously work on our manufacturing processes to reduce our environmental footprint and accept our products back at the end of their useful life for recycling.
