SPECIFICATIONS
Voltage: 220-240V ~50Hz
Power: 130W
Max. Current: 0.62A
Max. Pressure: 0.6PSI
Flow Rate: 440L/Min
Inflation Time: Under 2min
   (double air mattress)
Max. Run Time: 15min
Weight: 0.55kg

**ACCESSORIES**

6. Inflation Adaptors

---

**KNOX YOUR PRODUCT**

---

**SETUP & PREPARATION**

---

**1. ADAPTORS**

*WARNING: ENSURE THE TOOL IS SWITCHED OFF AND DISCONNECTED FROM THE POWER SUPPLY BEFORE PERFORMING ANY OF THE FOLLOWING STEPS.*

**Fitting an Adaptor**

1. Align the required adaptor with the port.

2. Push the adaptor onto the air port tightly.

**Removing Adaptors**

1. To remove, simply pull the adaptor from the air port.
2. SWITCHING ON & OFF

CAUTION! THE POWER SUPPLY FOR THIS PRODUCT SHOULD BE PROTECTED BY A RESIDUAL CURRENT DEVICE (RATED AT 30mA OR LESS).

1. To start operating the air pump, push the on/off switch to the on position.

2. To stop operation, push the on/off switch to the off position.

WARNING: COMPRESSED AIR CAN BE DANGEROUS. NEVER POINT THE OUTLET NOZZLE TOWARDS ANY PART OF YOUR BODY OR AT ANOTHER PERSON.

3. INFLATING ITEMS

IMPORTANT: BEFORE CONNECTING OR DISCONNECTING ACCESSORIES, ALWAYS MAKE SURE THAT THE AIR PUMP IS TURNED OFF.

1. Fit the required adaptor onto the inflation port tightly.

2. Insert the adaptor into the valve of the inflatable item.

3. Switch the air pump on at the on/off switch.

4. Once the item is inflated, switch the air pump off and then remove the adaptor from the valve.

WARNING: AVOID INFLATING THE OBJECTS ABOVE THE RECOMMENDED INFLATION PRESSURE. THIS MAY LEAD TO DAMAGE AND/OR INJURIES.
4. DEFLATING ITEMS

**IMPORTANT:** BEFORE CONNECTING OR DISCONNECTING ACCESSORIES, ALWAYS MAKE SURE THAT THE AIR PUMP IS TURNED OFF.

1. Fit the required adaptor onto the deflation port at the top of the unit tightly.

2. Insert the adaptor into the valve of the inflatable item.

**CAUTION:** ENSURE THE INFLATION PORT IS NOT OBSTUCTED, OTHERWISE THE UNIT COULD OVERHEAT.

3. Switch the air pump on at the on/off switch.

4. Once the item is deflated, switch the air pump off and then remove the adaptor from the valve.
## MAINTENANCE

**WARNING:** BEFORE CLEANING OR CARRYING OUT ANY MAINTENANCE PROCEDURE, ENSURE THE UNIT IS SWITCHED OFF, DISCONNECTED FROM THE POWER SUPPLY AND ALLOWED TO COOL DOWN.

### CLEANING

- Keep the ventilation vents of the air pump clean at all times, if possible, prevent foreign matter from entering the vents.

- After each use, blow air through the air pump housing to ensure it is free from all dust particles which may build up. Build up of dust particles may cause the air pump to overheat and fail.

- If the enclosure of the air pump requires cleaning do not use solvents but a moist soft cloth only. Never let any liquid get inside the product; never immerse any part of the air pump into a liquid.

**Note:** Ozito Industries will not be responsible for any damage or injuries caused by the repair of the air pump by an unauthorised person or by mishandling of the product.

**IMPORTANT:** STORE THE AIR PUMP ONLY IN A DRY LOCATION WHICH IS NOT ACCESSIBLE TO UNAUTHORISED PERSONS.

### CARING FOR THE ENVIRONMENT

Power tools that are no longer usable should not be disposed of with household waste but in an environmentally friendly way. Please recycle where facilities exist. Check with your local council authority for recycling advice.

Recycling packaging reduces the need for landfill and raw materials.

Reuse of recycled material decreases pollution in the environment. Please recycle packaging where facilities exist. Check with your local council authority for recycling advice.

### SPARE PARTS

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse.

For further information, or any parts not listed here, visit www.ozito.com.au or contact Ozito Customer Service:

- **Australia** 1800 069 486
- **New Zealand** 0508 069 486

E-mail: enquires@ozito.com.au
How To Order

Available spare parts can be ordered through the Special Orders Desk at any Bunnings Warehouse. If you have any further questions, please contact Ozito Customer Service on:

Australia: 1800 069 486
New Zealand: 0508 069 486

**ELECTRICAL SAFETY**

**WARNING!** When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury, and material damage.

Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool.

Save these instructions and other documents supplied with this tool for future reference.

The electric motor has been designed for 230V and 240V only. Always check that the power supply corresponds to the voltage on the rating plate.

Note: The supply of 230V and 240V on Ozito tools are interchangeable for Australia and New Zealand.

---

**GENERAL POWER TOOL SAFETY WARNINGS-PERSONAL SAFETY**

**WARNING!** Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. **Work area safety**
   a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
   b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable
      liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
   c. Keep children and bystanders away while operating a power tool. Distractions can cause
      you to lose control.

2. **Electrical safety**
   a. Power tool plugs must match the outlet. Never modify the plug in any way.
      Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs
      and matching outlets will reduce risk of electric shock.
   b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges
      and refrigerators. There is an increased risk of electric shock if your body is earthed or
      grounded.
   c. Do not expose power tools to rain or wet conditions. Water entering a power tool will
      increase the risk of electric shock.
   d. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power
      tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled
      cords increase the risk of electric shock.
   e. When operating a power tool, do not wear loose clothing or jewellery. Use an extension cord
      suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric
      shock.
   f. If operating a power tool in a damp location is unavoidable, use a residual current device
      (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

3. **Personal safety**
   a. Stay alert, watch what you are doing and use common sense when operating a power tool.
      Do not use a power tool while you are tired or under the influence of drugs, alcohol
      or medication.
   b. Maintain a proper grip. Keep your body and fingers away from the cutting area.
   c. Do not leave the tool when plugged in. Keep it off when not in use.
   d. Never leave the tool running when not in use. Switch it off whenever it is not in use, even for
      a few minutes.

4. **When using mains powered tools**
   a. Connect the power tool to a power source with a protective earthing conductor provided.
   b. The supply cord cannot be replaced. If the cord is damaged the appliance should be scrapped.
   c. Double insulation does not take the place of normal safety precautions when operating this tool.
   d. The insulation system is for added protection against injury resulting from a possible electrical insulation failure
      within the tool.

5. **Using an Extension Lead**
   Always use an approved extension lead suitable for the power input of this tool. Before use, inspect
   the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective.
   When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead
   that is not suitable for the power input of the tool which is damaged or defective may result in a risk of fire and
   electric shock.

---

**AIR PUMP SAFETY WARNINGS**

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

- Do not place the hose end against any part of your body when turned on, as this may
  cause injury to your body.
- Do not make any alterations to this air pump. Only use the adaptors supplied
  with this product.
- Use this product only in accordance with operation instructions included in this
  manual.
- It is not suggested that the air pump work continuously for more than 15
  minutes. If 15 minutes of use has been reached, turn it off and let it cool for 8
  minutes before use again.
- If the pump is making abnormal sounds or its temperature is quite high, turn
  off the power straight away and let it cool for at least 10 minutes before trying again.
- Improper use may result in damage of the air pump.
- Do not leave unattended and operating. Keep out of reach of children.
- Put the air pump in a dry place if it is not in use for an extended period of time.
- Keep the air pump away from flammable liquid or gas. Do not allow the
  pump to become wet.
- Never put the connector and adaptors into your mouth, ear or eye. They are not
  toys.
- Avoid inserting hands into the inlets/outlets of the air pump while it is connected
  to power.
- Before using the air pump, always inspect it visually. Do not use the pump if it is
  cracked and/or damaged. If the pump is damaged, contact Ozito customer service.
- Never work or perform maintenance on the pump without first making sure it has
  been disconnected from the mains power.

**IMPORTANT:**

- The electrical connection must always be made in a dry area. Make sure that
  electrical connections are protected from inundations.
- Protect the pump and the power cable from heat, oil or sharp edges.
- If damaged, The power cable must be replaced by a qualified electrician.
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

WARRANTY

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: valve adaptors etc.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
- Professional, industrial or high frequency use.

OZITO Australia/New Zealand (Head Office) 1-23 Letcon Drive, Bangholme, Victoria, Australia 3175.
