picture hanging solutions

artrack

the art of hanging

Artrack picture hanging systems have been designed to provide a modern and flexible solution to art hanging for homes, offices and gallery spaces.

Why use Artrack's picture hanging system?
Artrack allows you to change your display as often as you like, with the greatest of ease, so every picture you have will have a chance to shine!

Just invested in a rental property and you cringe at the thought of your tenants hammering and drilling holes into your freshly painted wall? Artrack GALLERY or SLIMLINE picture hanging systems mean hole free walls and your tenants can hang their pictures wherever they choose.

Artrack uses unique 'cable gripping' technology which means that the greater the weight of your hanging item, the stronger the hook grips to the cable. Giving you peace of mind that your valued painting is safely and securely hung.

Gallery Range

The **GALLERY** range is the original Artrack range and offers a heavy-duty track and hanging components. It's modern design and strength makes it the most superior range on the market.
